20th Baltic Chemistry Olympiad's newspaper

Issue 3

Hello, dear colleagues!

How did you like these days? Are you still thinking like real chemists and seeing everywhere formulas of elements? Do you still want to solve problems of chemistry tasks, smile and move? If your answer to these questions is – yes, we are really glad, that you liked these days.

Unfortunately we have to part

today, because Baltic Chemistry Olympiad is coming to its end. Anyway for some of you the great adventure is going to begin at the International Chemistry Olympiad.

How do you like Riga? We hope, you will have some tiny but bright memories and a desire to come back after a while and fully explore the city. Everyone from you has

fulfilled your tasks. Certainly, some of you did it better, some not so well but you all are winners.

Now smile because you have spent three great days at the Baltic Chemistry Olympiad. Good luck! Be a positive and excellent chemist!

DAILY PROGRAMME

9:00 Breakfast

Do you feel a little disquiet in your stomach? If so, have a quick breakfast, because very soon there is going to be the Closing Ceremony where everything will be clarified.

10:00 Closing Ceremony

The moment has come, all secrets

are going to be cleared up and we will find out the lucky ones, who have had the brightest minds, strongest nerves and good luck at doing the tasks.

12:00 Lunch

After good work always comes a reward, so everyone is welcome to the festive lunch, because some of you have a long voyage home ahead.

CHEMICAL ELEMENTS IN RIGA

Despite the blowing wind and overcast skies you weren't scared

and 4 heroic youngsters went to explore streets of Riga. How did they manage? In our opinion you ask them yourselves because they had to use their knowledge of chemistry in each task which led

to the next checkpoint. Tasks were diverse, so they had to use also their knowledge in geography to put together the map of Europe to discover which countries is missing as well as to tell where each chemical element were discovered. They touched the molecule struc-

tures to determine the structure of substance. In another task they smelled and even tasted what substance is contained in jars. These were just a few from all tasks. Thanks to the great youngsters who participated and the greatest joy is that the FRIENDSHIP won!

At the end we wish to say thank you for being nice, smiling and smart! Good luck in future and let chemistry be a part of your life!
