

Q&A Session-> Online Webinar, 27.01.2021

Module I – Data and Business Analytics

<p>Hello, dear moderator is it possible to change the settings for the previous webinar video on you tube posted on 21.01.2021 cause it's not possible to save it to my list to watch it later? You tube it is said :<i>"This action is turned off for content made for kids"</i></p>	<p>Video settings are intentionally selected as follows due to copyright. They will not be changed.</p> <p>You are not able to do that because the video is unlisted (so only people with the link can see it). Adding to lists is an option only for public video.</p>
<p>Was there any practical task from previous seminar? Or only to read MS materials?</p>	<p>The last slide of the lecturer had a task for next week. Please watch the video on the e-learning platform.</p>
<p>Hello! Can I ask a question? Now I am on Block 3, Perform analytics in Power BI module. I tried to apply AI Insights and found that there isn't AI Insights function browser in the Options. Where could I find it? Thank you.</p>	<p>There are lots of things where AI insights can be used – in Power BI services these can be extracted on dataset level, AI Insights in the Power Query are totally different thing. For Desktop version they used to be Preview features, not anymore (Power Query Add Column>AI Insights)</p> <p>More details how to enable AI Insights you could find here https://docs.microsoft.com/en-us/power-bi/transform-model/desktop-ai-insights</p>
<p>Hello! Will there be a possibility to review previous session?</p>	<p>You can watch all the previous webinar videos on the e-learning platform https://edu.lu.lv/course/index.php?categoryid=253 with the guest password: it2021</p>
<p>Good evening! How long time approximately webinar could take?</p>	<p>Approximate time of online webinar is 90 minutes.</p>
<p>Hey, I can't find the task from previous lecturer.</p>	<p>All recordings from online webinar can be find in the e-learning platform https://edu.lu.lv/course/index.php?categoryid=253 with guest password: it2021</p>
<p>Do I have to download Power Bi to my computer?</p>	<p>Please find instruction how to install and get access to Power BI tool.</p> <p>Download only Power BI DESKTOP version. And PRO version is not needed! You need PRO license for sharing and publishing reports at Power BI Services</p>
<p>Is there a way to connect zipped csv file from the WEB?</p>	<p>See more details here: https://community.powerbi.com/t5/Desktop/Import-a-zipped-csv-file-from-web-url/td-p/1309699</p>
<p>Will today's session content be more or less the same as yesterdays?</p>	<p>No, this session is more deep dive to explore Power BI opportunities.</p>
<p>Why presentation is performed through screenshots, but not in real Power BI environment?</p>	<p>Program Leaders role is to give you guidance in your learning process. In the second part of the webinar, the expert will show you how to operate in the environment.</p>
<p>Could u please paste the wiki / fifa stat page address?</p>	<p>https://en.wikipedia.org/wiki/UEFA_European_Football_Championship</p>
<p>From what site to download Power BI program</p>	<p>Please find instruction how to install and get access to Power BI tool.</p> <p>Download only Power BI DESKTOP version. And PRO version is not needed!</p>

<p>If data is imported from e.g. Wikipedia, will Power BI refresh data from it?</p>	<p>Yes, PBI will refresh ALL online sources (websites, clouds etc). but not LOCAL files (excel files store on computer etc.). You can also schedule a regular 'refresh' (It does not happen automatically otherwise!)"</p> <p>https://docs.microsoft.com/en-us/power-bi/connect-data/desktop-tutorial-importing-and-analyzing-data-from-a-web-page</p> <p>Power BI desktop will refresh all the sources when you press refresh button. Sometimes credentials would be needed, sometimes access path to the file used as a source</p>
<p>Doing labs in Microsoft Learning paths it was impossible to ""pin"" visualizations to dashboard, because there was no ""pin"" button on visualization upper right corner.</p>	<p>You can pin tiles from reports to dashboards. Pins are available when your report is published to PowerBi.com (Services), each visualization including image or textbox can be pinned to the dashboard at the workspace.</p> <p>Dashboards are a feature of the <i>Power BI service</i> only. They're not available in Power BI Desktop.</p>
<p>Hello, where I can download power BI for the macbook?</p>	<p>Power BI unfortunately does not support Mac devices some advice using virtual machine.</p> <p>https://www.holistics.io/blog/how-to-use-power-bi-on-mac-devices/</p>
<p>How to go back to power query editor if I notice in desktop that I have to redicate more data table? Or can I do all the same tricks to the table in desktop data page?</p>	<p>On top there is 'Transform' tab and there is 'Power Query' button. Click that and you'll go back to transforming data. This could be one of the questions worth leaving later when you decide to start a free trial period with Power BI Service.</p>
<p>How many students we have in low no code and in Power Bi module?</p>	<p>Close to 6,000 participants have registered for Module 1 of the program, and 4,000 close to Module 2</p>
<p>Where I can find valid, error or empty values?</p>	<p>In Query pane at View tab check the box for "Column Profile"</p>
<p>Will I be able to study in Microsoft Lab during course when ""try free"" time for Power BI expires?</p>	<p>If LAB are to be performed on a virtual machine, and in general it is, then yes.</p>
<p>In my power query editor the table column ""date"" have extra text, its shows like this September 7, 1985 (1985-09-07) should I first make a new calculating column to get these dates right or is there way how to tell to this column that is contains dates?</p>	<p>You have to check the type of the column. If the type is date, then simply change the formatting, otherwise necessary to transform text string to date.</p>
<p>Where to find examples to formulas for calculation tables and for dax?</p>	<p>https://docs.microsoft.com/en-us/dax/</p>
<p>For better Performance - it preferred use measures for calculation, or get the ready data directly form data source?"</p>	<p>Measures help you by performing calculations on your data as you interact with your reports, e.g., select some filters, or change base period from month to quarter.</p>
<p>What is the best way to solve problems if users use different decimal separator - for some separator is ',' others '.</p>	<p>This shouldn't be a problem until you start exchanging data using text files such as txt or csv. You can change the decimal separator in your computer's system settings.</p> <p>Standard is now comma separator. You can replace unnecessary symbols within Power Query if needed.</p>

Has anyone completed the first or second LAB?	You could find the answer to these questions in the Discord group. Feel free to join it and find your learning buddies: https://discord.gg/cuFq48BNeA
Please ask to Jevgenijs: Doing labs in Microsoft Learning paths it was impossible to ""pin"" visualizations to dashboard, because there was no ""pin"" button on visualization upper right corner	You can pin tiles from reports to dashboards. Dashboards are a feature of the <i>Power BI service</i> only. They're not available in Power BI Desktop.
How to auTomate stocks data?	https://powerbi.microsoft.com/en-us/developers/automation/
Most of the companies already have connected databases to Power BI, so how much of your time does data validation/importa/etc actually take and how Much of your time actual analysis, visualizations and stuff like that take?"	Depends on complication of analysis. You can check more here: https://www.forbes.com/sites/gilpress/2016/03/23/data-preparation-most-time-consuming-least-enjoyable-data-science-task-survey-says/?sh=2a95d4606f63
How to add or apply the automatic quality check with Valid/Error/Empty percentage at the top of every column?	Look for Power Query View>Data preview tab and tick the necessary boxes.
Good evening! if i would like to obtain the data from a website which is encoded, is it possible? (e.g. city24)	Try this https://docs.microsoft.com/en-us/power-bi/connect-data/desktop-connect-to-web-by-example#using-get-data-from-web-by-example
Where did you get this Excel from?	Microsoft sample data
Is it course for the beginners?	Yes. Learn quickly and it will seem very easy pretty soon 😊
How we can get the LAB's?	You access the LAB (virtual machine on which powerBI is installed and has files loaded) on Microsoft Learning Site.
When we visualize the data (graphs) and would like to analyze them by means of AI, is it possible to choose or limit the resources for the Power BI? e.g. ask the Power BI to use LETA news database to analyze the graphs)"	You can use Python or R code for extraction of data for queries in Power BI services, some limits can be there though if Azure Machine Learning services of Cognitive services are not used. For more details look here: https://docs.microsoft.com/en-us/power-bi/transform-model/desktop-ai-insights
What is AI ?	Artificial Intelligence
How much time will be this webinar?	Each webinar is taking place 90 minutes
How to get to that formula field?	Create new table, new column or new measure and it will appear automatically.
What are LABS everyone keeps talking about? Do we access them in PowerBI or Microsoft Learn platform?	In the Microsoft Learn Modules there are blocks with LAB.
Can you share with us all this data?	These data are provided within Microsoft partnership, I suppose we can use it for demonstration purposes only. Look for relevant materials within your learning module, some datasets are freely available online
