1. INTRODUCTION

ZAVOD RISA had already developed in 2019 a dictionary of "easier" synonyms- 600 suggestions on which words to use in Easy Slovene. The methodology for the preparation of the database/dictionary was shared with the partners and the database was expanded to

750 suggestions in 2021. The 150 new suggestions were tested/validated with a help of 21 end-users with intellectual disabilities. The methodology followed the 2019 methodology. The suggestions were discussed and validated in groups of end-users. Comprehension was thoroughly tested. For designing the list of common words, we took a corpus-based approach. Improved item classification and access to Slovene database (revised and refined search user experience) was conducted by an analytic- specialist. Some teaching and learning materials for dissemination during workshops and trainings have already been developed and piloted with the same groups of end-users as mentioned above.

2. THE ORIGINAL DATABASE AND THE UPGRADED DATABASE

The original database, which was developed within project Lahko je brati: Razvoj temeljnih usmeritev, metod, didaktičnih gradiv in spremljajočih orodij za lahko branje v Sloveniji¹ in 2018 and 2019, consisted of 600 common words in Slovene language. We tested them in groups of end-users and produced a dictionary of “Easy synonyms”. The original words 600 words are typed out in regular color and the 45 additional words, that were in 2021 selected and tested within project PERLSI: Promoting Easy-to-Read Language for Social Inclusion, and are already incorporated in the online dictionary², are typed out in blue:

- 1 - ampak
- 2 - avto
- 3 - avtor
- 4 - barva
- 5 - bati
- 6 - bel
- 7 - beseda
- 8 - besedilo
