

Promoting European Higher Education worldwide: BalticStudyNet 2005–2009

**International Conference at the University of Latvia in Riga, Latvia
November 12–14, 2009**

Being the closing event of the Erasmus Mundus-project *BalticStudyNet – Promoting Baltic Sea Region Higher Education worldwide*, the conference will evaluate the project's promotional and informational measures. After a résumé by the partner consortium and the project managers, the floor is given to former participants in BalticStudyNet-activities. They report on their use of the experiences made during summer schools, workshops or as hosts of lecture and promotion tours. A panel discussion on the design and impact of the project as such and its activities and materials by international marketing and region experts completes the conference programme.
